

# Baseball Registration System

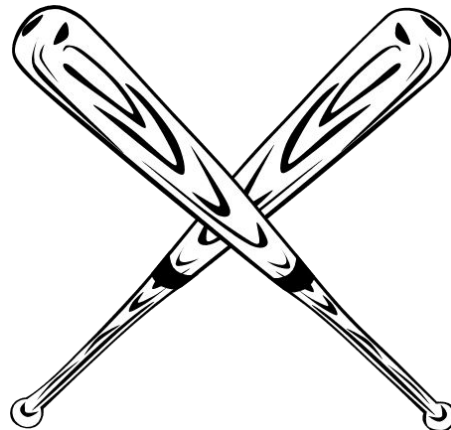

Zach Butler, Rhett Godwin, Cat Kramka

## Who it's For

The baseball registration system we have created is for the company known as Innovative Solutions Corporation. The stakeholders of the company wanted a way to streamline the registration process for the company's annual baseball tournament. The system serves to improve the registration process and tournament management for employees and system admins alike.

# What it Does

- Creates team formation
- Allows user to sign up for a team and position
- Allows multiple views of data
- User notifications
- Registration system.
- Robust admin system that can edit, remove, and add players

# Demo Roadmap

- Use cases
  - Registration, login, selecting a team and position, admin account functionality, etc.
- Showcase user experience of program
- Showcase admin experience of program
- Interface design explanation
- Backend functionality
